

WEBSITE DESIGN & DEVELOPMENT PROCESS

This step involves organizing and structuring the website's content and features.

ARCHITECTURE

Once the wireframes and prototypes are approved, the web designer focuses on the visual aspect of the website.

DESIGN

In this stage, the design files are handed over to the web development team.

DEVELOPMENT

Once the website passes testing and receives client approval, it is ready for launch.

DEPLOYMENT

DISCOVERY

This includes conducting research, gathering information, and creating a project plan.

PROTOTYPING

Wireframes are visual representations that outline the layout and structure of each page on the website.

CONTENT

Concurrently with the visual design phase, content creation takes place.

TESTING

Testing includes checking links, forms, page loading speed, and overall performance.

MAINTENANCE

After the website is live, ongoing support and maintenance are necessary.

Building a Successful Business

In the dynamic world of business, laying a strong foundation is crucial. Discover the fundamental steps to establish a thriving enterprise that not only survives but excels in today's competitive landscape.
